PLAN FOR THE UNEXPECTED: KNOW YOUR FINANCIAL RIGHTS AND RESOURCES

Carrying cash is risky. During an emergency, your money is safest if it's electronic—with a bank account, credit union, or on a prepaid card. Know your full rights and create an economic plan. It will help you use your money and resources in case of the unexpected. Keep control over your money by following these four simple steps:

PROTECT YOUR MONEY

Get out of cash: use a bank account, or credit, debit and prepaid cards that can be used anywhere, anytime.

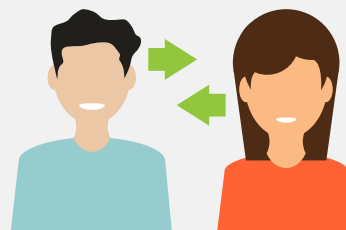

ASSESS YOUR ASSETS

List and know all of your accounts details, from amounts to login information.

KNOW YOUR BUDGET

Save for potential costs involved with the unexpected.

CREATE A SAFETY PLAN

Let trusted family members and friends know where your money is and how to help you use it.
